AI-Powered Oracle Forms Modernization for the Enterprise

Faster. Smarter. Safer.

Premier Support for Oracle Forms 12c ends December 2026.
Plan your move to APEX.

The Forms 12c Deadline Is Approaching

Version	Premier Support	Extended Support
Oracle Forms 12c	Dec 2026	Dec 2027
Oracle Forms 14c	Dec 2030	Dec 2033

Come December, Oracle will no longer provide updates or security fixes for Forms 12c. Without a migration plan, you risk paying a premium for Extended Support and running out of time altogether.

"Our Oracle forms were developed in the early 2000s. There was barely any documentation and the developers who built them had left years ago. Kodesage created a complete model of the system and the full technical documentation within weeks, giving us the confidence to commit to the migration."

IT Project Lead
International oil and gas company

Why APEX

Future-Proof

Forms 14c buys you time.
APEX builds your future.

Modern Platform

UI and integration capabilities
Oracle Forms can't match.

No License Fees

Included with your Oracle
Database license.

AI-Ready

Unlocks Oracle's AI
capabilities natively.

Stop Paying the Legacy Tax

Oracle Forms applications are **outdated**, **painful** to manage, and yet **mission-critical**. Replacing them is often considered too **expensive**, too **risky**, or both.

Kodesage changes the business case.

3x

faster discovery

Support

4

Unified Knowledge Base & Living Documentation

- 1. Full codebase analysis and expert sessions for better insight
- 2. Per-module complexity overview and AI-assisted migration
- 3. Auto-generated UI tests executed on both Forms and APEX

- 4. AI-generated solutions for bug fixes and new features including tests
- 5. AI knowledge assistant, customizable templates, audit-ready documentation, and API and MCP access

Scope Your Migration

Special
Offer

A Proof of Concept delivers a complete migration assessment, so you can decide with confidence.
